

# Key Cutting Machine

## Börkey 909 EURO-DRILL

BÖRKEY TECHNOLOGY  
Quality  
with  
tradition  
MADE IN GERMANY

Semi-automatic key cutting machine of the latest Börkey generation for the cutting of drill type and track keys. When developing this machine greatest importance has been attached to newest technology, easy handling, design, highest quality and precision.

### Characteristics

- ✓ Automatic starting
- ✓ Automatic locking device for feeler- and cutter-unit by using a magnet with push-button switch. Therefore optimal stability and highest precision when cutting keys
- ✓ Quick clamping devices for fast and time-saving change of feeler and cutter
- ✓ Two selectable motor-speed levels of 5.000 r.p.m. with HSS-cutter and 10.000 r.p.m. with HM-cutter
- ✓ Jaws with anti-twisting device are synchronized to rotate up to 45°, abrasion parts of the jaws are replaceable
- ✓ Precise roller guides of milling table for forward motion and backward movements (x-axle) and constant lateral pressure (y-axle)
- ✓ The guide of drill-resp. cutter head in Z-direction is made by precision grounded linear-bearing on carriage. Therefore an optimal repeat accuracy and durable precision is granted
- ✓ Carriage guide freely moves with optimal spring pressure
- ✓ Electromechanical adjusting of cutting depths of feeler- and cutting unit by LED-display
- ✓ Drawer for tools for 5 pairs of cutter / feeler
- ✓ LED illumination
- ✓ Protection against swarfs

### Technical Data:

Net: 26 kgs  
Space required: W 35 x H 51 x D 41 cms  
Motor: 230 V / 50 cycles  
Input: 120 w

### CIF-Data:

Net: 26 kgs  
Gross: 30 kgs  
Dimensions: W 38 x H 52 x D 50 cms
